REVIEW

Anefiya Nurdos graduated from Satbayev University under the educational program 6B07109 “Engineering Physics and Materials Science”.

He is currently employed at the JSC “National Center of Space Research and Technology” as a Leading Engineer and is involved in the implementation of research activities within Project AP 234038/0223.

Within the framework of his professional duties, he participates in experimental and engineering work related to the development and investigation of polymer materials for aerospace applications. His responsibilities include preparation of material formulations, determination and optimization of component ratios, processing and fabrication of laboratory samples, and conducting experimental studies of physical, mechanical, and operational properties.

He takes part in planning and performing laboratory experiments, analyzing and systematizing obtained data, and evaluating the compliance of developed materials with technical and operational requirements. In addition, he is involved in preparing technical reports, documenting experimental results, and supporting project-related research activities in accordance with established standards and procedures.

Anefiya Nurdos demonstrates a structured approach to problem-solving, technical competence, and the ability to work both independently and as part of a research team. He fulfills assigned tasks within established deadlines and maintains professional discipline in his work.

Deputy Chairman of the Board
